

PRESS RELEASE For Immediate Release

Wenzel Spine Receives ISO 13485:2003 Certification

AUSTIN, TX June 30, 2010 – Wenzel Spine, Inc., a medical device company focused on offering less invasive, stand-alone alternatives to traditional spinal fusion, today announced that it has received ISO 13485:2003 certification for its quality management system.

Wenzel Spine received ISO 13485:2003, which represents the requirements that medical device manufacturers must incorporate into their quality management systems. The certification emphasizes meeting regulatory as well as customer requirements, risk management and maintaining effective processes specific to the safe design, manufacture and distribution of medical devices.

“We are pleased to accomplish certification to the 13485:2003 standard within our first year of operation,” said Chad Neely, Chief Executive Officer of Wenzel Spine, Inc.

This certification is maintained by the International Organization of Standardization, the world’s largest developer and publisher of international industrial and commercial standards for business. Companies that achieve these certifications are recognized within the medical device industry and by international regulatory bodies as operating at the highest standards of quality. This certification provides external objective evidence and recognition of leading management systems, achievement of continual high quality standards and customer satisfaction.

“Having a well executed quality management system is essential as we go to market with our VariLift® Stand-Alone Expandable Interbody Fusion System,” said Chad Neely, Chief Executive Officer of Wenzel Spine, Inc.

Wenzel Spine’s VariLift Stand-Alone Interbody Fusion System can be used without pedicle screws and rods and is now commercially available in North America and Europe.

About Wenzel Spine, Inc.

Wenzel Spine offers minimally invasive solutions for stand-alone treatment of disc herniations, spinal stenosis, and spondylolisthesis. We deliver simple, dependable, and proven alternatives to traditional interbody spinal fusion, including the patented VariLift® Expandable Interbody Fusion System. Our products help simplify and shorten spine surgery, while providing superior clinical patient outcomes. Wenzel Spine is dedicated to improving the overall quality of spine care, while reducing the cost to health care providers.
